

Best of the best

The craftsmen at New England Welding are among the best in their trade.

Our staff goes through stringent training and has the experience necessary to handle just about any project.

All of our welders are certified in ASW D 1.1 and are adept at MIG and TIG welding techniques. Our fabricators also have expertise in tube-bending, laser cutting, forming, rolling, machining and fabricating - everything you need for a quality finished product!

New England Welding specializes in the welding & fabricating of projects using the finest aluminum and stainless steel. We also offer design consultation as well as CAD drawings. Some of these projects include:

- Entry doors & frames
- Staircases
- Railings - Interior / Exterior
- Architectural projects

Custom metal fabrications

New England Welding services a broad range of clientele including:

- Architects
- Designers
- General Contractors
- Builders
- Real Estate Developers
- Building owners
- Corporate Accounts
